INDEPENDENT AUDITOR'S REPORT

To the Honorable Mayor and Members of the City Council City of Mineola, Texas:

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the discretely presented component unit, each major fund, and the aggregate remaining fund information of the City of Mineola, Texas (the "City"), as of and for the year ended September 30, 2018, and the related notes to the financial statements, which collectively comprise the City's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

The City's management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion.

An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the discretely presented component unit, each major fund, and the aggregate remaining fund information of the City as of September 30, 2018 and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Emphasis of Matter

As discussed in Note V.G. to the financial statements, due to the implementation of GASB No. 75, the City restated its beginning net position within governmental activities and business-type activities to properly reflect the total OPEB liability and related deferred outflows and inflows of resources, as prescribed by this accounting standard. In addition, the City restated beginning net position and fund balances within governmental funds due to a fund reclassification. Our opinion is not modified with respect to these matters.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, the general fund budgetary comparison information, the schedule of changes in net pension liabilities and related ratios, the schedule of employer contributions to pension plan, and schedule of changes in the other postemployment benefits liability and related ratios, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the

information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinion on the financial statements that collectively comprise City of Mineola, Texas' basic financial statements. The combining and individual nonmajor fund financial statements are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The supplementary information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the accompanying supplementary information is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

MANAGEMENT'S DISCUSSION AND ANALYSIS

MANAGEMENT'S DISCUSSION AND ANALYSIS (MD&A) September 30, 2018

As management of the City of Mineola, Texas (the "City"), we offer readers of the City's financial statements this narrative overview and analysis of the financial activities of the City for the fiscal year ended September 30, 2018. We encourage readers to consider the information presented here in conjunction with additional information contained in this report.

Financial Highlights

- The City's total combined net position was \$14,658,974 at September 30, 2018. Of this, \$1,738,429
 (unrestricted net position) may be used to meet the City's ongoing obligations to its citizens and
 creditors.
- At the close of the current fiscal year, the City's governmental funds reported combined fund balances of \$1,235,185, an increase of \$189,795.
- As of the end of the year, the unassigned fund balance of the general fund was \$1,015,332 or 22% of total general fund expenditures.
- The City had an overall increase in net position of \$773,905.
- The City closed the year with a net pension asset of \$667,107.

Overview of the Financial Statements

The discussion and analysis provided here are intended to serve as an introduction to the City's basic financial statements. The City's basic financial statements consist of three components: 1) government-wide financial statements, 2) fund financial statements, and 3) the notes to financial statements. This report also includes supplementary information intended to furnish additional detail to support the basic financial statements themselves.

Government-Wide Statements

The *government-wide financial statements* are designed to provide readers with a broad overview of the City's finances, in a manner similar to a private-sector business.

The *statement of net position* presents information on all of the City's assets and liabilities. The difference between the two is reported as *net position*. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the City is improving or deteriorating. Other non-financial factors, such as the City's property tax base and the condition of the City's infrastructure, need to be considered in order to assess the overall health of the City.

The statement of activities presents information showing how the City's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving

MANAGEMENT'S DISCUSSION AND ANALYSIS, Continued September 30, 2018

rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported for some items that will only result in cash flows in future fiscal periods (e.g., uncollected taxes and earned but unused vacation leave).

Both of the government-wide financial statements distinguish functions of the City that are principally supported by taxes and intergovernmental revenues (*governmental activities*) from other functions that are intended to recover all or a significant portion of their costs through user fees and charges (*business-type activities*). The governmental activities of the City include general government, public safety, public works, culture and recreation, and economic development. The business-type activities of the City include water and sewer, and solid waste operations.

FUND FINANCIAL STATEMENTS

A *fund* is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The City, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. All of the funds of the City can be divided into three categories: governmental funds, proprietary funds, and fiduciary funds.

Governmental Funds

Governmental funds are used to account for essentially the same functions reported as *governmental* activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on *near-term inflows and outflows of spendable* resources, as well as on *balances of spendable resources* available at the end of the fiscal year. Such information may be useful in assessing a government's near-term financing requirements.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for *governmental funds* with similar information presented for *governmental* activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between *governmental funds* and *governmental activities*.

The City maintains four individual governmental funds. Information is presented separately in the governmental fund balance sheet and in the governmental fund statement of revenues, expenditures, and changes in fund balances for the general fund and debt service fund, which are considered to be major funds. Data from the other governmental funds are combined into a single, aggregated presentation. Individual fund data for each of these nonmajor governmental funds is provided in a separate section of the report.

MANAGEMENT'S DISCUSSION AND ANALYSIS, Continued September 30, 2018

The City adopts an annual appropriated budget for its general, debt service, and nature preserve project funds. A budgetary comparison statement has been provided for the general fund to demonstrate compliance with their respective budget.

Proprietary Funds

The City's proprietary funds are all enterprise funds. *Enterprise funds* are used to report the same functions presented as *business-type activities* in the government-wide financial statements. The City uses an enterprise fund to account for its water and sewer operations. All activities associated with providing such services are accounted for in these funds, including administration, operation, maintenance, debt service, capital improvements, meter maintenance, billing and collection. The City's intent is that costs of providing the services to the general public on a continuing basis is financed through user charges in a manner similar to a private enterprise.

Proprietary financial statements provide the same type of information as the government-wide financial statements, only in more detail. The proprietary fund financial statements provide separate information for the water and sewer fund, which is considered to be a major fund of the City.

Component Units

The City maintains the accounting and financial statements for one component unit. The Mineola Economic Development Corporation, which is a discretely presented component unit, is presented separately within the Statement of Net Position and Statement of Activities.

Notes to Financial Statements

The notes provide additional information that is necessary to acquire a full understanding of the data provided in the government-wide and fund financial statements.

Other Information

In addition to the basic financial statements, MD&A, and accompanying notes, this report also presents certain Required Supplementary Information (RSI). The required RSI includes a budgetary comparison schedule for the general fund, schedule of changes in the net pension asset and related ratios and schedule of employer contributions for the Texas Municipal Retirement System. RSI can be found after the basic financial statements.

GOVERNMENT-WIDE FINANCIAL ANALYSIS

As noted previously, net position may serve over time as a useful indicator of the City's financial position. For the City of Mineola, assets exceed liabilities by \$14,658,974 as of September 30, 2018, in the primary government.

MANAGEMENT'S DISCUSSION AND ANALYSIS, Continued September 30, 2018

The largest portion of the City's net position, \$11,800,475, reflects its investments in capital assets (e.g., land, city hall, police station, streets, and drainage systems, as well as the public works facilities), less any debt used to acquire those assets that are still outstanding. The City uses these capital assets to provide services to citizens; consequently, these assets are not available for future spending. Although the City's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the assets themselves cannot be used to liquidate these liabilities.

The following table reflects the condensed Statement of Net Position:

	2018							2017							
	G	overnmental	Bu	isiness-Type			G	overnmental	В	usiness-Type

Total Net Position	\$	6,239,823	\$	8,419,151	\$	14,658,974	\$	5,838,205	\$	8,046,864	\$	13,885,069			

Current and other assets for governmental activities increased by \$336,443. This increase is primarily due to increased cash on hand, resulting from the City's revenues exceeding expenses in the current year. Current liabilities for governmental activities increased by \$389,271. This increase is primarily due to increased payables to vendors and an increase in current maturities on long-term debt. Total long-term liabilities decreased by \$890,358 mainly as a result of principal payments made on long-term debt in the current year.

MANAGEMENT'S DISCUSSION AND ANALYSIS, Continued September 30, 2018

MANAGEMENT'S DISCUSSION AND ANALYSIS, Continued September 30, 2018

Graphic presentations of selected data from the summary tables are displayed below to assist in the analysis of the City's activities.

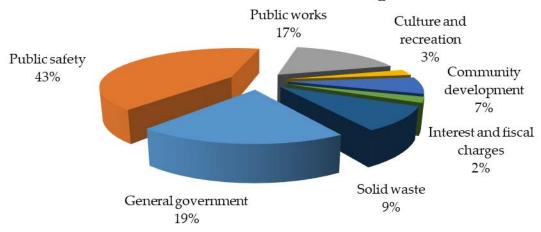

Governmental Activities - Revenues

For the year ended September 30, 2018, revenues from governmental activities totaled \$5,559,626. Property tax, sales tax and charges for services are the City's largest revenue sources. Grants and contributions increased by \$330,228 due primarily to nonrecurring CDBG grant funds received in the current year. Charges for services increased by \$234,679 primarily due to greater court citation revenue collected in the current year. Interest income increased by \$60,266 due to an increase in interest-bearing cash accounts. All other revenues remained relatively stable when compared to the previous year.

This graph shows the governmental function expenses of the City:

Governmental Activities - Expenses

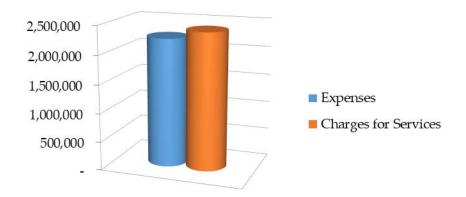

For the year ended September 30, 2018, expenses for governmental activities totaled \$5,158,008. This represents an increase of \$337,171 or 7% from the prior year. The City's largest functional expense is public safety of \$2,194,890, which increased by \$253,920 primarily due to increases in employee salaries

MANAGEMENT'S DISCUSSION AND ANALYSIS, Continued September 30, 2018

and Meredith grant donation related expenditures. General government expenditures increased by \$149,213 primarily due to greater employee salaries and benefits and municipal court expenditures. Culture and recreation expenses increased by \$78,112 due primarily to salaries, utilities, and depreciation expenses. Community development expenses increased by \$69,202 due to increased tourism and special program related expenses. Interest and fiscal charges decreased by \$164,454 due to the recognition of debt issuance costs in the prior year.

Business-type activities are shown comparing operating costs to revenues generated by related services.

Business-Type Activities - Revenues and Expenses

For the year ended September 30, 2018, charges for services by business-type activities totaled \$2,396,288. This is an increase of \$254,880 or 12%, from the previous year. The increase is primarily a result of an increase in utility billing rates and water and sewer consumption by the City's customer base. \$111,661 of intergovernmental revenues were recognized as contributions in the current year as a result of funds transferred to the water and sewer fund from the City's discretely presented component unit.

Total expenses slightly increased by \$41,218 or 2% during the year.

FINANCIAL ANALYSIS OF THE CITY'S FUNDS

As noted earlier, fund accounting is used to demonstrate and ensure compliance with finance-related legal requirements.

<u>Governmental Funds</u> - The focus of the City's governmental funds is to provide information of near-term inflows, outflows and balances of spendable resources. Such information is useful in assessing the City's financing requirements. In particular, unreserved fund balance may serve as a useful measure of the City's net resources available for spending at the end of the year.

MANAGEMENT'S DISCUSSION AND ANALYSIS, Continued September 30, 2018

As of the end of the year the general fund reflected an ending fund balance of \$1,210,834. Unassigned fund balance totaled \$1,015,332 as of year end. There was an overall increase in general fund balance of \$196,349 from the prior year. The increase was a result of current year revenues and other financing sources exceeding expenditures.

As of the end of the year the CDBG grant fund reflected an ending fund balance of negative \$56,800. The fund balance decreased \$13,000 from the prior year. The decrease was a result of capital outlay expenditures exceeding grant revenues in the current year.

<u>Proprietary Funds</u> - The City's proprietary funds provide the same type of information found in the government-wide financial statements, but in more detail.

GENERAL FUND BUDGETARY HIGHLIGHTS

There was a total positive revenue variance of \$362,774 and a negative expenditure variance of \$138,164 for the year. The positive revenue variance was primarily due to a positive variance in fines and forfeitures and grant revenue of \$178,628 and \$65,599, respectively. The negative expenditure variance was primarily due to a negative variance in general government and community development of \$83,927 and \$85,267, respectively. Other financing sources (uses) had an overall negative budget variance of \$25,170. This variance was primarily due to a negative variance in insurance proceeds of \$25,370. The total budget variance was a positive variance of \$199,440.

CAPITAL ASSETS

As of the end of the year, the City's governmental activities funds had invested \$8,854,332 in a variety of capital assets and infrastructure, net of accumulated depreciation. Depreciation is included with the governmental capital assets as required by GASB Statement No. 34. The City's business-type activities funds had invested \$15,196,507 in a variety of capital assets and infrastructure, net of accumulated depreciation.

Major capital asset events during the current year include the following:

- Investment in Sanderson Farms engineering and construction totaling \$537,262.
- Purchase of new public works equipment through capital lease financing for \$80,984.
- Purchase of new public works vehicle for \$32,488.
- Investment in elevated storage tank totaling \$201,723.
- Engineering investments for wastewater treatment plant amounting to \$49,168.
- Purchase of new vehicle for water and sewer department for \$32,488.

MANAGEMENT'S DISCUSSION AND ANALYSIS, Continued September 30, 2018

More detailed information about the City's capital assets is presented in note IV. C to the financial statements.

LONG-TERM DEBT

At the end of the current year, the City had total bonds, notes, and leases outstanding of \$16,567,183. During the year, the City payments on long-term debt were \$810,373. Also, during the year, the City entered into a new capital lease agreement for purchase of equipment totaling \$80,984. More detailed information about the City's long-term liabilities is presented in note IV. D to the financial statements.

ECONOMIC FACTORS AND NEXT YEAR'S BUDGET

The Mayor and City Council are committed to maintaining and improving the overall wellbeing of the City of Mineola and improving services provided to their public citizens. The City is budgeting for growth in the upcoming year.

CONTACTING THE CITY'S FINANCIAL MANAGEMENT

This financial report is designed to provide a general overview of the City of Mineola' finances for all those with an interest in the City's finances. Questions concerning this report or requests for additional financial information should be directed to the City Finance Director, 300 Greenville Highway, Mineola, Texas 75773.

RECONCILIATION OF THE BALANCE SHEET TO THE STATEMENT OF NET POSITION GOVERNMENTAL FUNDS

September 30, 2018

Fund Balances - Total Governmental Funds	\$ 1,235,185
Adjustments for the Statement of Net Position:	
Capital assets used in governmental activities are not current financial	
resources and, therefore, not reported in the governmental funds.	
Capital assets - non-depreciable	2,590,456
Capital assets - net depreciable	6,263,876
Other long-term assets are not available to pay for current-period	
expenditures and, therefore, are deferred in the governmental funds.	
Property tax receivable	121,729
Net pension asset	513,672
Deferred outflows of resources, represent a consumption of net position that applies	
to a future period(s) and is not recognized as an outflow of resources (expenditure)	
until then.	
Pension contributions	53,480
Pension changes in assumptions	24,456
OPEB contributions	593
OPEB differences in expected and actual experience	6,757
Deferred inflows of resources, represents an acquisition of net position that applies to a future	
period(s) and so will not be recognized as an inflow of resources (revenue) until that time.	
Pension differences in expected and actual experience	(10,460)
Pension investment losses (earnings)	(137,601)
Deferred gain on refunding	(11,279)
Some liabilities, including bonds payable and deferred charges, are not reported as	
liabilities in the governmental funds.	
Accrued interest	(13,920)
Compensated absences	(153,556)
OPEB liability	(101,774)
Bonds, notes, and capital leases	(4,141,791)
Net Position of Governmental Activities	\$ 6,239,823

RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES, AND CHANGES IN FUND BALANCES OF GOVERNMENTAL FUNDS TO THE STATEMENT OF ACTIVITIES

For the Year Ended September 30, 2018

Amounts reported for governmental activities in the statement of activities are different because:

Net changes in fund balances - total governmental funds \$ 189,795

Governmental funds report capital outlays as expenditures. However, in the statement of activities the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense.

Capital outlay 727,926

Depreciation expense (455,435)

Revenues in the statement of activities that do not provide current financial resources are not reported as revenues in the funds. 4,325

Some expenses reported in the statement of activities do not require the use of current

financial resources and, therefore, are not reported as expenditures in governmental funds.

Compensated absences (84,526)
Accrued interest (9,144)
Pension expense (26,778)
OPEB expense (8,409)

The issuance of long-term debt (e.g., bonds, leases, certificates of obligation) provides current financial resources to governmental funds, while the repayment of the principal of long-term debt consumes the current financial resources of governmental funds. Neither transaction, however, has any effect on net position. Also, governmental funds report the effect of premiums, discounts, and similar items when they are first issued; whereas, these amounts are deferred and amortized in the statement of activities. This amount is the net effect of these differences in the treatment of long-term debt and related items.

Lease proceeds	(80,984)
Amortization of debt premium	19,141
Amortization of deferred gain on refunding	745
Principal payments	120,373
Principal amount paid before due	4,589
Change in Net Position of Governmental Activities	\$ 401,618

NOTES TO FINANCIAL STATEMENTS September 30, 2018

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. Description of Government-Wide Financial Statements

The government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on all of the nonfiduciary activities of the primary government and its component units. *Governmental activities*, which normally are supported by taxes, intergovernmental revenues, and other nonexchange transactions, are reported separately from *business-type activities*, which rely to a significant extent on fees and charges to external customers for support. Likewise, the *primary government* is reported separately from certain legally separate *component units* for which the primary government is financially accountable.

B. Reporting Entity

The City of Mineola, Texas, operates under a "Mayor-City Council" form of government. The City provides the following services: general administration, police, fire, planning and zoning, street, solid waste, and water and sewer services.

The City is an independent political subdivision of the State of Texas governed by an elected council and is considered a primary government for financial reporting purposes as its activities are not considered a part of any other governmental or other type of reporting entity. As required by generally accepted accounting principles, these basic financial statements have been prepared based on considerations regarding the potential for inclusion of other entities, organizations, or functions as part of the City's financial reporting entity. The Mineola Economic Development Corporation ("EDC") although legally separate, is considered part of the reporting entity. No other entities have been included in the City's reporting entity. Additionally, as the City is considered a primary government for financial reporting purposes, its activities are not considered a part of any other governmental or other type of reporting entity.

Considerations regarding the potential for inclusion of other entities, organizations or functions in the City's financial reporting entity are based on criteria prescribed by generally accepted accounting principles. These same criteria are evaluated in considering whether the City is a part of any other governmental or other type of reporting entity. The overriding elements associated with prescribed criteria considered in determining that the City's financial reporting entity status is that of a primary government are that it has a separately elected governing body; it is legally separate; and is fiscally independent of other state and local governments. Additionally prescribed criteria under generally accepted accounting principles include considerations pertaining to organizations for which the primary government is financially accountable, and considerations pertaining to organizations for which the nature and significance of their relationship with the primary government are such that exclusion would cause the reporting entity's financial statements to be misleading or incomplete.

NOTES TO FINANCIAL STATEMENTS, Continued September 30, 2018

Discretely Presented Component Unit

Mineola Economic Development Corporation

The Mineola Economic Development Corporation is governed by a board of seven directors, all of whom are appointed by the City Council at its will. One member of the board of directors is a member of City Council and all others are appointed citizens. The City Administrator is an exofficio member without voting rights. The sole purpose of the Mineola Economic Development Corp. is to determine the use of the proceeds of a \$0.5 cent city sales tax for the benefit of the citizens of Mineola. Although legally separate from the City of Mineola, the Mineola Economic Development Corp. is reported as if it were part of the primary government because of the City's control over the financial operations and decisions of the Mineola Economic Development Corp. The Corporation is discretely presented as a result of none of the criteria for blending being present.

C. Basis of Presentation - Government-Wide and Fund Financial Statements

While separate government-wide and fund financial statements are presented, they are interrelated. The governmental activities column incorporates data from governmental funds while business-type activities incorporate data from the government's enterprise funds. Separate financial statements are provided for governmental funds and the proprietary funds.

As a general rule, the effect of interfund activity has been eliminated from the government-wide financial statements. Exceptions to this general rule are payments in lieu of taxes where the amounts are reasonably equivalent in value to the interfund services provided and other charges between the government's water and transit functions and various other functions of the government. Elimination of these charges would distort the direct costs and program revenues reported for the various functions concerned.

The fund financial statements provide information about the government's funds, including its blended component units. Separate statements for each fund category—governmental and proprietary are presented. The emphasis of fund financial statements is on major governmental and enterprise funds, each displayed in a separate column. All remaining governmental and enterprise funds are aggregated and reported as nonmajor funds. Major individual governmental and enterprise funds are reported as separate columns in the fund financial statements.

The government reports the following major governmental funds:

General Fund

The general fund is the main operating fund of the City and is used to account for all financial transactions not properly includable in other funds. The principal sources of revenues include local property taxes, sales and franchise taxes, licenses and permits, fines and

NOTES TO FINANCIAL STATEMENTS, Continued September 30, 2018

forfeitures, and charges for services. Expenditures include general government, public safety, public works, solid waste, and culture and recreation.

CDBG Grant Fund

The CDBG grant fund accounts for all transactions related to the City's CDBG grant activity. The principal sources of revenues include CDBG grant revenue. Expenditures include capital outlay.

Proprietary Fund Types

Proprietary funds are used to account for activities that are similar to those often found in the private sector. All assets, liabilities, equities, revenues, expenses, and transfers relating to the government's business activities are accounted for through proprietary funds. The measurement focus is on determination of net income, financial position, and cash flows. Proprietary funds distinguish operating revenues and expenses from non-operating items. Operating revenues include charges for services. Operating expenses include costs of materials, contracts, personnel, and depreciation. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses. Proprietary fund types follow GAAP prescribed by the Governmental Accounting Standards Board (GASB) and all financial Accounting Standards Board's standards issued prior to November 30, 1989. Subsequent to this date, the City accounts for its enterprise funds as presented by GASB. The government reports the following major enterprise fund:

Water and Sewer Fund

The water and sewer fund is used to account for the provision of water & wastewater collection and wastewater treatment operations Activities of the fund include administration, operations and maintenance of the water system, and billing and collection activities. The fund also accounts for the accumulation of resources for, and the payment of, long-term debt principal and interest. All costs are financed through charges to utility customers with rates reviewed regularly and adjusted if necessary to ensure integrity of the fund.

During the course of operations the government has activity between funds for various purposes. Any residual balances outstanding at year end are reported as due from/to other funds and advances to/from other funds. While these balances are reported in fund financial statements, certain eliminations are made in the preparation of the government-wide financial statements. Balances between the funds included in governmental activities (i.e., the governmental and internal service funds) are eliminated so that only the net amount is included as internal balances in the governmental activities column. Similarly, balances between the funds included in business-type activities (i.e., the enterprise funds) are eliminated so that only the net amount is included as internal balances in the business-type activities column.

Further, certain activity occurs during the year involving transfers of resources between funds. In

NOTES TO FINANCIAL STATEMENTS, Continued September 30, 2018

fund financial statements these amounts are reported at gross amounts as transfers in/out. While reported in fund financial statements, certain eliminations are made in the preparation of the government-wide financial statements. Transfers between the funds included in governmental activities are eliminated so that only the net amount is included as transfers in the governmental activities column. Similarly, balances between the funds included in business-type activities are eliminated so that only the net amount is included as transfers in the business-type activities column.

D. Measurement Focus and Basis of Accounting

The accounting and financial reporting treatment applied to a fund is determined by its measurement focus. Measurement focus refers to what is being measured and basis of accounting refers to when transactions are recorded in the financial records and reported on the financial statements and relates to the timing of the measurement made, regardless of the measurement focus applied.

The government-wide statements and fund financial statements for proprietary funds are reported using the economic resources measurement focus and the accrual basis of accounting.

The economic resources measurement focus means all assets and liabilities (whether current or non-current) are included on the statement of net position and the operating statements present increases (revenues) and decreases (expenses) in total net position. Under the accrual basis of accounting, revenues are recognized in the accounting period in which they are earned and become measurable, and expenses in the accounting period in which they are incurred and become measurable. Proprietary fund equity consists of net position. Proprietary fund-type operating statements present increases (i.e., revenues) and decreases (i.e., expenses) in net total assets.

All governmental funds and component units are reported using the current financial resources measurement focus and are accounted for using the modified accrual basis of accounting. Under the modified accrual basis of accounting, revenues are recognized in the accounting period when they are susceptible to accrual (i.e., when they are measurable and available). Measurable means the amount of the transaction can be determined and available means collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the City considers revenues available if they are collected within 60 days of the end of the current period. Property taxes, sales taxes, franchise taxes, and interest associated with the current period are all considered to be susceptible to accrual and so have been recognized as revenues of the current period. Other receipts and other taxes become measurable and available when cash is received by the government and are recognized as revenue at that time.

Generally, the effect of interfund activity has been eliminated from the government-wide financial statements.

NOTES TO FINANCIAL STATEMENTS, Continued September 30, 2018

E. Estimates

The preparation of financial statements, in conformity with generally accepted accounting principles, requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenditures/expenses during the reporting period. Actual results could differ from those estimates.

F. Assets, Liabilities, Deferred Inflows/Outflows, and Net Position/Fund Balance

1. Deposits and Investments

The City's cash and cash equivalents are considered to be cash on hand, demand deposits and short term investments with original maturities of three months or less from the date of acquisition. For the purpose of the statement of cash flows, the proprietary fund types consider temporary investments with maturity of three months or less when purchased to be cash equivalents.

In accordance with GASB Statement No. 31, Accounting and Reporting for Certain Investments and External Investment Pools, the City reports all investments at fair value, except for "money market investments" and "2a7-like pools." Money market investments, which are short-term highly liquid debt instruments that may include U.S. Treasury and agency obligations, are reported at amortized costs. Investment positions in external investment pools that are operated in a manner consistent with the SEC's Rule 2a7 of the Investment Company Act of 1940, such as TexSTAR, are reported using the pools' share price.

The City has adopted a written investment policy regarding the investment of its funds as defined in the Public Funds Investment Act, Chapter 2256, of the Texas Governmental Code. In summary, the City is authorized to invest in the following:

Direct obligations of the U.S. Government Fully collateralized certificates of deposit and money market accounts Statewide investment pools

2. Receivables and Interfund Transactions

Transactions between funds that are representative of lending/borrowing arrangements outstanding at the end of the year are referred to as either "interfund receivables/payables" (i.e., the current portion of interfund loans) or "advances to/from other funds" (i.e., the non-current portion of interfund loans). All other outstanding balances between funds are reported as "due to/from other funds" in the fund financial statements. If the transactions are between the primary government and its component unit, these receivables and payables are classified as "due to/from component unit/primary government." Any residual balances

NOTES TO FINANCIAL STATEMENTS, Continued September 30, 2018

outstanding between the governmental activities and business-type activities are reported in the government-wide financial statements as "internal balances."

Advances between funds are offset by a fund balance reserve account in the applicable governmental fund to indicate they are not available for appropriation and are not expendable available financial resources.

All trade receivables are shown net of any allowance for uncollectible amounts.

3. Property Taxes

Property taxes are levied by October 1 on the assessed value listed as of the prior January 1 for all real and business personal property in conformity with Subtitle E, Texas Property Tax Code. Taxes are due on receipt of the tax bill and are delinquent if not paid before February 1 of the year following the year in which imposed. Penalties are calculated after February 1 up to the date collected by the government at the rate of 6% for the first month and increased 1% per month up to a total of 12%. Interest is calculated after February 1 at the rate of 1% per month up to the date collected by the government. Under state law, property taxes levied on real property constitute a lien on the real property which cannot be forgiven without specific approval of the State Legislature. The lien expires at the end of twenty years. Taxes levied on personal property can be deemed uncollectible by the City.

4. Inventories and Prepaid Items

The costs of governmental fund type inventories are recorded as expenditures when the related liability is incurred, (i.e., the purchase method). The inventories are valued at the lower of cost or market using the first-in/first-out method. Certain payments to vendors reflect costs applicable to future accounting periods (prepaid expenditures) are recognized as expenditures when utilized.

5. Capital Assets

Capital assets, which include property, plant, equipment, and infrastructure assets (e.g., roads, bridges, sidewalks, and similar items) are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. Capital assets are defined by the government, as assets with an initial individual cost of more than \$5,000 and an estimated useful life in excess of one year. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated fair market value at the date of donation. Major outlays for capital assets and improvements are capitalized as projects are constructed.

Interest costs incurred in connection with construction of enterprise fund capital assets are capitalized when the effects of capitalization materially impact the financial statements.

NOTES TO FINANCIAL STATEMENTS, Continued September 30, 2018

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend assets' lives are not capitalized.

Property, plant, and equipment of the primary government, as well as the component units, are depreciated using the straight-line method over the following estimated useful years.

	Estimated
Asset Description	Useful Life
Machinery and equipment	6 to 15 years
Infrastructure	40 years
Buildings and improvements	20 to 45 years

6. Deferred Outflows/Inflows of Resources

In addition to assets, the statement of net position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net position that applies to a future period(s) and so will not be recognized as an outflow of resources (expense/ expenditure) until then.

An example is a deferred charge on refunding reported in the government-wide statement of net position. A deferred charge on refunding results from the difference in the carrying value of refunded debt and its reacquisition price. This amount is deferred and amortized over the shorter of the life of the refunded or refunding debt.

In addition to liabilities, the statement of financial position will sometimes report a separate section for *deferred inflows of resources*. This separate financial statement element, deferred inflows of resources, represents an acquisition of net position that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The government has only one type of item, which arises only under a modified accrual basis of accounting that qualifies for reporting in this category. Accordingly, the item, *unavailable revenue*, is reported only in the governmental funds balance sheet. The governmental funds report unavailable revenues from property taxes and fines and forfeitures. These amounts are deferred and recognized as an inflow of resources in the period that the amounts become available. Deferred inflows of resources can also occur at the government wide level due to differences between investment gains and losses realized on pension investments compared to assumption used within the pension actuarial valuation model.

7. Net Position Flow Assumption

Sometimes the government will fund outlays for a particular purpose from both restricted (e.g., restricted bond or grant proceeds) and unrestricted resources. In order to calculate the amounts to report as restricted – net position and unrestricted – net position in the government-wide statements, a flow assumption must be made about the order in which the resources are considered to be applied.

NOTES TO FINANCIAL STATEMENTS, Continued September 30, 2018

It is the government's policy to consider restricted – net position to have been depleted before unrestricted – net position is applied.

8. Fund Balance Flow Assumptions

Sometimes the government will fund outlays for a particular purpose from both restricted and unrestricted resources (the total of committed, assigned, and unassigned fund balance). In order to calculate the amounts to report as restricted, committed, assigned, and unassigned fund balance in the governmental fund financial statements a flow assumption must be made about the order in which the resources are considered to be applied. It is the government's policy to consider restricted fund balance to have been depleted before using any of the components of unrestricted fund balance. Further, when the components of unrestricted fund balance can be used for the same purpose, committed fund balance is depleted first, followed by assigned fund balance. Unassigned fund balance is applied last.

9. Fund Balance Policies

Fund balance of governmental funds is reported in various categories based on the nature of any limitations requiring the use of resources for specific purposes. The government itself can establish limitations on the use of resources through either a commitment (committed fund balance) or an assignment (assigned fund balance).

The committed fund balance classification includes amounts that can be used only for the specific purposes determined by a formal action of the government's highest level of decision-making authority. The governing council is the highest level of decision-making authority for the government that can, by adoption of an ordinance prior to the end of the fiscal year, commit fund balance.

Once adopted, the limitation imposed by the ordinance remains in place until a similar action is taken (the adoption of another ordinance) to remove or revise the limitation.

Amounts in the assigned fund balance classification are intended to be used by the government for specific purposes but do not meet the criteria to be classified as committed. The governing body (council) has by resolution authorized the finance director to assign fund balance. The council may also assign fund balance as it does when appropriating fund balance to cover a gap between estimated revenue and appropriations in the subsequent year's appropriated budget. Unlike commitments, assignments generally only exist temporarily. In other words, an additional action does not normally have to be taken for the removal of an assignment. Conversely, as discussed above, an additional action is essential to either remove or revise a commitment.

NOTES TO FINANCIAL STATEMENTS, Continued September 30, 2018

10. Compensated Absences

The City maintains formal programs for vacation and sick leave. Eligible employees are granted vacation pay benefits in varying amounts to specified maximums depending on tenure with the City. The City's personnel policy permits its eligible employees to accumulate earned but unused vacation pay benefits. Upon separation from the City, employees will be paid for their accrued and unused vacation pay benefits earned in the year.

Sick leave accrues to eligible employees to specified maximums, including the maximum number of hours that can be carried over from the previous year. Upon retirement or death, unused sick leave is not paid to the employee.

The estimated amount of accrued vacation and sick pay benefits that is expected to be liquidated with expendable available financial resources is reported as an expenditure and a fund liability of the governmental fund that will pay it upon maturity. Amounts of accrued vacation pay benefits that are not expected to be liquidated with expendable available financial resources are maintained separately and represent a reconciling item between the fund and government-wide presentations.

11. Long-Term Obligations

In the government-wide financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities statement of net position. The long-term debt consists primarily of bonds payable, capital leases, and accrued compensated absences.

Long-term debt for governmental funds is not reported as liabilities in the fund financial statements until due. The debt proceeds are reported as other financing sources, net of the applicable premium or discount and payments of principal and interest reported as expenditures. In the governmental fund types, issuance costs, even if withheld from the actual net proceeds received, are reported as debt service expenditures. However, claims and judgments paid from governmental funds are reported as a liability in the fund financial statements only for the portion expected to be financed from expendable available financial resources.

Long-term debt and other obligations, financed by proprietary funds, are reported as liabilities in the appropriate funds. For proprietary fund types, bond premiums, discounts and issuance costs are deferred and amortized over the life of the bonds using the effective interest method, if material. Bonds payable are reported net of the applicable bond premium or discount.

Assets acquired under the terms of capital leases are recorded as liabilities and capitalized in the government-wide financial statements at the present value of net minimum lease payments at inception of the lease. In the year of acquisition, capital lease transactions are

NOTES TO FINANCIAL STATEMENTS, Continued September 30, 2018

recorded as other financing sources and as capital outlay expenditures in the general fund. Lease payments representing both principal and interest are recorded as expenditures in the general fund upon payment with an appropriate reduction of principal recorded in the government-wide financial statements.

12. Pensions

For purposes of measuring the net pension liability (asset), deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the Fiduciary Net Position of the Texas Municipal Retirement System (TMRS) and additions to/deductions from TMRS's Fiduciary Net Position have been determined on the same basis as they are reported by TMRS. For this purpose, plan contributions are recognized in the period that compensation is reported for the employee, which is when contributions are legally due. Benefit payments and refunds are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

13. Other Postemployment Benefits ("OPEB")

The City has implemented GASB Statement No. 75, Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions. This statement applies to the individual employers (TMRS cities) in the TMRS Supplemental Death Benefits (SDB) plan, with retiree coverage. The TMRS SDBF covers both active and retiree benefits with no segregation of assets, and therefore doesn't meet the definition of a trust under GASB No. 75 (i.e., no assets are accumulated for OPEB) as such the SDBF is considered to be an unfunded OPEB plan. For purposes of reporting under GASB 75, the retiree portion of the SDBF is not considered a cost sharing plan and is instead considered a single employer, defined benefit OPEB plan. The death benefit for active employees provides a lump-sum payment approximately equal to the employee's annual salary, calculated based on the employee's actual earnings on which TMRS deposits are made, for the 12-month period preceding the month of death. The death benefit amount for retirees is \$7,500. GASB No. 75 requires the liability of employers and nonemployer contributing entities to employees for defined benefit OPEB (net OPEB liability) to be measured as the portion of the present value of projected benefit payments to be provided to current active and inactive employees that is attributed to those employees' past periods of service (total OPEB liability), less the amount of the OPEB plan's fiduciary net position.

G. Revenues and Expenditures/Expenses

1. Program Revenues

Amounts reported as *program revenues* include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment and 2) grants and contributions (including special assessments) that are restricted to meeting the operational or capital requirements of a particular function or

NOTES TO FINANCIAL STATEMENTS, Continued September 30, 2018

segment. All taxes, including those dedicated for specific purposes, and other internally dedicated resources are reported as general revenues rather than as program revenues.

2. Proprietary Funds Operating and Nonoperating Revenues and Expenses

Proprietary funds distinguish operating revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations.

The principal operating revenues of the water and sewer fund are charges to customers for sales and services. The water and sewer fund also recognizes as operating revenue the portion of tap fees intended to recover the cost of connecting new customers to the system. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

II. RECONCILIATION OF GOVERNMENT-WIDE AND FUND FINANCIAL STATEMENTS

A. Explanation of certain differences between the governmental fund balance sheet and the government-wide statement of net position.

The governmental fund balance sheet includes reconciliation between *fund balance-total governmental funds* and *net position-governmental activities* as reported in the government-wide statement of net position. One element of that reconciliation explains that long-term liabilities, including bonds, are not due and payable in the current period and, therefore, are not reported in the funds. Reconciling items have been presented on the balance sheet of governmental funds in the basic financial statements.

B. Explanation of certain differences between the governmental fund statement of revenues, expenditures, and changes in fund balances and the government-wide statement of activities.

The governmental fund statement of revenues, expenditures, and changes in fund balances includes a reconciliation between net changes in fund balances – total governmental funds and changes in net position of governmental states that, "the issuance of long-term debt (e.g., bonds) provides current financial resources to governmental funds, while the repayment of the principal of long-term debt consumes the current financial resources of governmental funds. Also, governmental funds report the effect of premiums, discounts, and similar items when debt is first issued, whereas these amounts are deferred and amortized in the statement of activities." A reconciliation has been presented in the basic financial statements.

III. STEWARDSHIP, COMPLIANCE, AND ACCOUNTABILITY

The City's investment policy requires full collateralization of all time and bank deposits consistent with Chapter 2257 of the Public Funds Collateral Act. As of September 30, 2018, the City had insufficient collateral investments covering the bank deposits at one banking institution.

NOTES TO FINANCIAL STATEMENTS, Continued September 30, 2018

This resulted in \$134,558 of bank deposits uninsured and without collateral as of September 30, 2018.

Annual budgets are adopted on a basis consistent with generally accepted accounting principles (GAAP) for the general fund. The original budget is adopted by the City Council prior to the beginning of the year. No funds can be transferred or added to a budgeted fund without Council approval. Appropriations lapse at the end of the year.

A. Expenditures in Excess of Appropriations

For the current year, expenditures exceeded appropriations as follows:

General fund:

General government	\$ 83,927
Community development	85,267
Solid waste	45,107
Principal	2,326
Capital outlay	34,903

B. Deficit Fund Balance

The CDBG fund had a deficit fund balance of \$56,800 as of September 30, 2018 due to current capital outlay expenditures in excess of grant funds.

IV. DETAILED NOTES ON ALL FUNDS

A. Deposits and Investments

Interest rate risk In accordance with its investment policy, the City manages its exposure to declines in fair values by limiting the weighted average of maturity not to exceed three years; structuring the investment portfolio so that securities mature to meet cash requirements for ongoing operations; monitoring credit ratings of portfolio position to assure compliance with rating requirements imposed by the Public Funds Investment Act; and invest operating funds primarily in short-term securities or similar government investment pools.

Credit risk: The City's investment policy limits investments to obligations of the United States, State of Texas, Certificates of Deposit, Repurchase agreements, Insured Cash Sweeps (ICS), and Certificate of Deposit Account Registry (CDARs).

Custodial credit risk – deposits: In the case of deposits, this is the risk that in the event of a bank failure, the City's deposits may not be returned to it. State statutes require that all deposits in financial institutions be insured or fully collateralized by U.S. government obligations or its agencies and instrumentalities or direct obligations of Texas or its agencies and instrumentalities that have a market value of not less than the principal amount of the deposits. The City's

NOTES TO FINANCIAL STATEMENTS, Continued September 30, 2018

investment policy requires funds on bank deposit at the depository bank to be collateralized by securities with a collective market value (market value of the principal and accrued interest) of at least 102%. As of September 30, 2018, the City had insufficient collateral investments covering the bank deposits at one banking institution. This resulted in \$134,558 of bank deposits uninsured and without collateral as of September 30, 2018.

Custodial credit risk – investments: For an investment, this is the risk that, in the event of the failure of the counterparty, the City will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. The City's investment policy requires that it will seek to safekeeping securities at financial institutions, avoiding physical possession. Further, all trades, where applicable, are executed by delivery versus payment to ensure that securities are deposited in the City's safekeeping account prior to the release of funds.

B. Receivables

The following comprise receivable balances of the primary government at year end:

		No	onmajor	Water &		
	General	Gov	ernmental	Sewer	Total	
Solid waste	\$ 99,738	\$	-	\$ -	\$ 99,738	
Sales tax	236,093		-	-	236,093	
Property tax	156,078		13,105	-	169,183	
Franchise and other taxes	63,761		-	-	63,761	
Accounts	-		-	331,175	331,175	
Allowance	(51,136)		-	(7,181)	(58,317)	
	\$ 504,534	\$	13,105	\$ 323,994	\$ 841,633	

The following comprise receivable balances of the discretely presented component unit at year end:

		Economic			
	Dev. Co				
Sales tax	\$	117,140			
	\$	117,140			

NOTES TO FINANCIAL STATEMENTS, Continued September 30, 2018

C. Capital Assets

A summary of changes in governmental activities capital assets for the year end was as follows:

	F	Beginning			Decre	eases/	Ending Balances		
		Balances	I	ncreases	Reclassif	fications			
Capital assets, not being depreciated:									
Land	\$	2,053,194	\$	537,262	\$	-	\$	2,590,456	
Total capital assets not being depreciated		2,053,194		537,262		-		2,590,456	
Capital assets, being depreciated:									
Buildings and improvements		3,662,156		66,973		-		3,729,129	
Machinery & equipment		3,876,926		123,691		-		4,000,617	
Infrastructure		6,611,441		-		-		6,611,441	
Total capital assets being depreciated		14,150,523		190,664				14,341,187	
Less accumulated depreciation									
Buildings and improvements		(2,121,024)		(95,852)		-		(2,216,876)	
Machinery & equipment		(3,135,592)		(183,363)		-		(3,318,955)	
Infrastructure		(2,365,260)		(176,220)		-		(2,541,480)	
Total accumulated depreciation		(7,621,876)		(455,435)		-		(8,077,311)	
Net capital assets being depreciated		6,528,647		(264,771)		-		6,263,876	
Total Net Capital Assets	\$	8,581,841	\$	272,491	\$	_	\$	8,854,332	

Depreciation was charged to governmental functions as follows:

General government	\$ 44,246
Public safety	103,874
Public works	237,163
Culture and recreation	70,152
Total Governmental Activities Depreciation Expense	\$ 455,435

The carrying value of leased capital assets was \$156,098 as of September 30, 2018.

NOTES TO FINANCIAL STATEMENTS, Continued September 30, 2018

A summary of changes in business-type activities capital assets for the year end was as follows:

	I	Beginning			Decreases/	Ending		
		Balances	Increases		Reclassifications	Balances		
Capital assets, not being depreciated:								
Land	\$	1,498,522	\$	378,376	\$ -	\$ 1,876,898		
Total capital assets not being depreciated		1,498,522		378,376		 1,876,898		
Capital assets, being depreciated:								
Water & sewer system		21,344,187		-	-	21,344,187		
Buildings and improvements		43,552		-	-	43,552		
Machinery and equipment		896,117		32,488	-	928,605		
Total capital assets being depreciated		22,283,856		32,488		22,316,344		
Less accumulated depreciation								
Water & sewer system		(7,614,221)		(566,290)	-	(8,180,511)		
Buildings and systems		(37,333)		(1,369)	-	(38,702)		
Machinery and equipment		(734,768)		(42,754)	-	(777,522)		
Total accumulated depreciation		(8,386,322)		(610,413)		 (8,996,735)

D. Long-term Debt

The following is a summary of changes in the City's total long-term liabilities for the year ended. In general, the City uses the debt service fund to liquidate certain governmental long-term liabilities.

]	Beginning Balance	I	Additions	Reductions	Ending Balance	I	Amounts Oue within One Year
Governmental Activities:								
Bonds and other payables:								
General Obligation Bonds	\$	245,000	\$	-	\$ (50,000)	\$ 195,000	\$	195,000
General Obligation Refunding Bonds		3,430,000		-	-	3,430,000		-
Note payable		64,915		-	(32,060)	32,855		32,855
Capital leases		151,657		80,984	(38,313)	194,328		58,692
Premium		308,749		-	(19,141)	289,608		-
Other liabilities:								
Compensated Absences		69,030		84,526	-	153,556		138,201
Total Governmental Activities	\$	4,269,351	\$	165,510	\$ (139,514)	\$ 4,295,347	\$	424,748
Long-term liabilities due in more than one year						\$ 3,870,599		
Business-Type Activities:								
Bonds, leases, and other payables:								
General Obligation Bond	\$	710,000	\$	-	\$ (105,000)	\$ 605,000	\$	105,000
Certificates of Obligation		12,695,000		-	(585,000)	12,110,000		560,000
Premium		579,176		-	(32,582)	546,594		-
Other liabilities:								
Compensated Absences		34,574		26,628	-	61,202		55,082
Total Business-Type Activities	\$	14,018,750	\$	26,628	\$ (722,582)	\$ 13,322,796	\$	720,082
Long-term liabilities due in more than	one ye	ear				\$ 12,602,714		

Long-term liabilities applicable to the City's governmental activities are not due and payable in the current period and accordingly, are not reported as fund liabilities in the governmental funds. Interest on long-term debt is not accrued in governmental funds, but rather is recognized as an expenditure when due.

NOTES TO FINANCIAL STATEMENTS, Continued September 30, 2018

Long-term debt at year end was comprised of the following debt issues:

		overnmental Activities		Business - Type Activities		Total
General Obligation Bonds:						
\$4,180,000 General Obligation Bond, Series 2007, due in						
installments through 2028, interest at 4.15% to 5.00%	\$	195,000	\$	-	\$	195,000

E. Deferred Charges on Refunding

Deferred charges resulting from the issuance of series 2017 general obligation refunding and bonds have been recorded as deferred inflows of resources and are being amortized to interest expense over the shorter of either the remaining term of the refunded debt or the refunding certificates of obligation. End of year balance totaled \$11,279 for governmental activities. Current year amortization expense for governmental activities totaled \$745.

F. Customer Deposits

The City had customer deposits of \$144,512 in the water and sewer fund as of year end. The City requires a refundable deposit for all new utility customers. This amount will be returned to the customer when utility service is discontinued and all outstanding utility expenses are paid.

NOTES TO FINANCIAL STATEMENTS, Continued September 30, 2018

G. Fund Equity

The City records fund balance restrictions on the fund level to indicate that a portion of the fund balance is legally restricted for a specific future use or to indicate that a portion of the fund balance is not available for expenditures.

The following is a list of fund balances restricted/committed by the City:

	Restricted			Committed
Debt service	\$	25,668	\$	-
Law enforcement		32,507	*	-
Park development		54,857		-
Museum, Main Street, Landmarks		-		50,630
Fire department equipment		-		60,642
	\$	113,032	\$	111,272

^{*} Restricted by enabling legislation

IV. OTHER INFORMATION

A. Risk Management

The City is exposed to various risks of loss related to torts; theft of, damage to and destruction of assets, errors and omissions; and natural disasters for which the City participates along with more than 2,800 other entities in the Texas Municipal League's Intergovernmental Risk Pools. The Pool purchases commercial insurance at group rates for participants in the Pool. The City has no additional risk or responsibility to the Pool outside of the payment of insurance premiums.

The City has not significantly reduced insurance coverage or had settlements which exceeded coverage amounts for the past three years.

The City uses a number of approaches to decrease risks and protect against losses to the City, including internal practices, employee training, and a code of ethics, which all employees are required to acknowledge

The City owns and operates motor vehicles and may provide such vehicle to employees for business use during the course and scope of their employment. The City is insured as to its own property losses, and the liability of loss to others.

B. Contingent Liabilities

Amounts received or receivable from granting agencies are subject to audit and adjustment by grantor agencies, principally the federal government. Any disallowed claims, including amounts

NOTES TO FINANCIAL STATEMENTS, Continued September 30, 2018

already collected, may constitute a liability of the applicable funds. The amounts of expenditures which may be disallowed by the grantor cannot be determined at this time although the City expects such amounts, if any, to be immaterial.

Liabilities are reported when it is probable that a loss has occurred and the amount of the loss can be reasonably estimated. Liabilities include an amount for claims that have been incurred but not reported. Claim liabilities are calculated considering the effects of inflation, recent claim settlement trends, including frequency and amount of payouts, and other economic and social factors.

The City participates in grant programs which are governed by various rules and regulations of the grantor agencies. Costs charged to the respective grant programs are subject to audit and adjustment by the grantor agencies; therefore, to the extent that the City had not complied with the rules and regulations governing the grants, refunds of any money received may be required and the collectability of any related receivable may be impaired. In the opinion of the City, there are no significant contingent liabilities relating to compliance with the rules and regulations governing the respective grants; therefore, no provision has been recorded in the accompanying basic financial statements for such contingencies.

C. Arbitrage

The Tax Reform Act of 1986 instituted certain arbitrage consisting of complex regulations with respect to issuance of tax-exempt bonds after August 31, 1986. Arbitrage regulations deal with the investment of tax-exempt bond proceeds at an interest yield greater than the interest yield paid to bondholders. Generally, all interest paid to bondholders can be retroactively rendered taxable if applicable rebates are not reported and paid to the Internal Revenue Service at least every five years for applicable bond issues. Accordingly, there is the risk that if such calculations are not performed correctly, a substantial liability to the City could result. The City does not anticipate that it will have an arbitrage liability and reviews the estimate for this potential liability annually. The City will also engage an arbitrage consultant to perform the calculations in accordance with Internal Revenue Service's rules and regulations if indicated.

D. Defined Benefit Pension Plans

Texas Municipal Retirement System

1. Plan Description

The City participates as one of 883 plans in the nontraditional, joint contributory, hybrid defined benefit pension plan administered by the Texas Municipal Retirement System (TMRS). TMRS is an agency created by the State of Texas and administered in accordance with the TMRS Act, Subtitle G, Title 8, Texas Government Code (the TMRS Act) as an agent multiple-employer retirement system for municipal employees in the State of Texas. The TMRS Act places the general administration and management of the System with a six-

NOTES TO FINANCIAL STATEMENTS, Continued September 30, 2018

member Board of Trustees. Although the Governor, with the advice and consent of the Senate, appoints the Board, TMRS is not fiscally dependent on the State of Texas. TMRS's defined benefit pension plan is a tax-qualified plan under Section 401 (a) of the Internal Revenue Code. TMRS issues a publicly available comprehensive annual financial report (CAFR) that can be obtained at www.tmrs.com.

All eligible employees of the city are required to participate in TMRS.

2. Benefits Provided

TMRS provides retirement, disability, and death benefits. Benefit provisions are adopted by the governing body of the city, within the options available in the state statutes governing TMRS.

At retirement, the benefit is calculated as if the sum of the employee's contributions, with interest, and the city-financed monetary credits with interest were used to purchase an annuity. Members may choose to receive their retirement benefit in one of seven payments options. Members may also choose to receive a portion of their benefit as a Partial Lump Sum Distribution in an amount equal to 12, 24, or 36 monthly payments, which cannot exceed 75% of the member's deposits and interest.

The plan provisions are adopted by the governing body of the City, within the options available in the state statutes governing TMRS. Plan provisions for the City were as follows:

	Plan Year 2017	Plan Year 2016
Employee deposit rate	5.0%	5.0%
Matching ratio (city to	2 to 1	2 to 1
employee)		
Years required for vesting	5	5
Service retirement eligibility		
(expressed as age / years of	60/5, 0/20	60/5, 0/20
service)		
Updated service credit	100% Repeating Transfers	100% Repeating Transfers
Annuity increase (to retirees)	0% of CPI Repeating	0% of CPI Repeating

Employees covered by benefit terms

At the December 31, 2017 valuation and measurement date, the following employees were covered by the benefit terms:

Inactive employees or beneficiaries currently receiving benefits	29
Inactive employees entitled to but not yet receiving benefits	37
Active employees	50
Total	116

NOTES TO FINANCIAL STATEMENTS, Continued September 30, 2018

3. Contributions

The contribution rates for employees in TMRS are either 5%, 6%, or 7% of employee gross earnings, and the city matching percentages are either 100%, 150%, or 200%, both as adopted by the governing body of the City. Under the state law governing TMRS, the contribution rate for each city is determined annually by the actuary, using the Entry Age Normal (EAN) actuarial cost method. The actuarially determined rate is the estimated amount necessary to finance the cost of benefits earned by employees during the year, with an additional amount to finance any unfunded accrued liability.

Employees for the City of Mineola were required to contribute 5% of their annual gross earnings during the fiscal year. The contribution rates for the City of Mineola were 4.27% and 4.38% in calendar years 2018 and 2017, respectively. The City's contributions to TMRS for the year ended September 30, 2018 were \$91,650.

4. Net Pension Liability

The City's Net Pension Liability (NPL) was measured as of December 31, 2017, and the Total Pension Liability (TPL) used to calculate the Net Pension Liability was determined by an actuarial valuation as of that date.

Actuarial assumptions:

The Total Pension Liability in the December 31, 2017 actuarial valuation was determined using the following actuarial assumptions:

Inflation 2.5% per year Overall payroll growth 3.0% per year

Investment Rate of Return 6.75% net of pension plan investment expense, including

inflation

Salary increases were based on a service-related table. Mortality rates for active members, retirees, and beneficiaries were based on the gender-distinct RP2000 Combined Healthy Mortality Tables with Blue Collar Adjustment, with male rates multiplied by 109% and female rates multiplied by 103%. The rates are projected on a fully generational basis by scale BB to account for future mortality improvements. For disabled annuitants, the gender-distinct RP2000 Combined Healthy Mortality Tables with Blue Collar Adjustment are used with males rates multiplied by 109% and female rates multiplied by 103% with a 3-year set-forward for both males and females. In addition, a 3% minimum mortality rate is applied to reflect the impairment for younger members who become disabled. The rates are projected on a fully generational basis by scale BB to account for future mortality improvements subject to the 3% floor.

NOTES TO FINANCIAL STATEMENTS, Continued September 30, 2018

The actuarial assumptions were developed primarily from the actuarial investigation of the experience of TMRS over the four year period from December 31, 2010 to December 31, 2014. They were adopted in 2015 and first used in the December 31, 2015 actuarial valuation. The post-retirement mortality assumption for healthy annuitants and Annuity Purchase Rate (APRs) are based on the Mortality Experience Investigation Study covering 2009 through 2011 dated December 31, 2013. In conjunction with these changes first used in the December 31, 2013 valuation, the System adopted the Entry Age Normal actuarial cost method and a one-time change to the amortization policy. Plan assets are managed on a total return basis with an emphasis on both capital appreciation as well as the production of income, in order to satisfy the short-term and long-term funding needs of TMRS.

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. In determining their best estimate of a recommended investment return assumption under the various alternative asset allocation portfolios, GRS focused on the area between (1) arithmetic mean (aggressive) without an adjustment for time (conservative) and (2) the geometric mean (conservative) with an adjustment for time (aggressive). The target allocation and best estimates of real rates of return for each major asset class in fiscal year 2018 are summarized in the following table:

Asset Class	Target Allocation	Long-Term Expected Real
		Rate of Return (Arithmetic)
Domestic Equity	17.5%	4.55%
International Equity	17.5%	6.35%
Core Fixed Income	10.0%	1.00%
Non-Core Fixed Income	20.0%	3.90%
Real Return	10.0%	3.80%
Real Estate	10.0%	4.50%
Absolute Return	10.0%	3.75%
Private Equity	5.0%	7.50%
Total	100.0%	

Discount Rate:

The discount rate used to measure the Total Pension Liability was 6.75%. The projection of cash flows used to determine the discount rate assumed that employee and employer contributions will be made at the rates specified in statute. Based on that assumption, the pension plan's Fiduciary Net Position was projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the Total Pension Liability.

NOTES TO FINANCIAL STATEMENTS, Continued September 30, 2018

Changes in the Net Pension Liability (Asset):

	Total Pension	Plan Fiduciary	Net Pension
	Liability (a)	Net Position (b)	(Asset)(a) - (b)
Balance at 12/31/16	\$ 6,122,145	\$ 6,363,533	\$ (241,388)
Changes for the year:			
Service Cost	214,213	-	214,213
Interest (on the Total Pension Liab.)	410,713	-	410,713
Difference between expected and			
actual experience	21,446	-	21,446
Changes of assumptions	-	-	-
Contributions – employer	-	91,092	(91,092)
Contributions – employee	-	103,987	(103,987)
Net investment income	-	881,814	(881,814)
Benefit payments, including			
refunds of emp. contributions	(289,242)	(289,242)	-

Balance at 12/31/17	\$ 6,479,275	\$ 7,146,382	\$ (667,107)

Sensitivity of the net pension liability (asset) to changes in the discount rate:

The following presents the net pension liability (asset) of the City, calculated using the discount rate of 6.75%, as well as what the City's net pension liability (asset) would be if it were calculated using a discount rate that is 1-percentage-point lower (5.75%) or 1-percentage-point higher (7.75%) than the current rate:

1% Decrease			Current Single Rate	1% Increase		
5.75%		Assumption 6.75%			7.75%	
\$	196,046	\$	(667,107)	\$	(1,377,700)	

Pension Plan Fiduciary Net Position:

Detailed information about the pension plan's Fiduciary Net Position is available in a separately-issued TMRS financial report. That report may be obtained on the internet at www.tmrs.com.

5. <u>Pension Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions</u>

For the year ended September 30, 2018, the City recognized pension expense of \$122,823.

NOTES TO FINANCIAL STATEMENTS, Continued September 30, 2018

At September 30, 2018, the City reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources		Deferred (Inflows) of Resources	
Difference between projected and				
investment earnings	\$	-	\$	178,703
Differences between expected and actual				
economic experience		-		13,585
Changes in assumptions		31,761		-
Contributions subsequent to the				
measurement date		69,455		-
Total	\$	101,216	\$	192,288

The City reported \$69,455 as deferred outflows of resources related to pensions resulting from contributions subsequent to the measurement date that will be recognized as a reduction of the net pension liability for the year ending September 30, 2019.

Other amounts reported as deferred outflows and inflows of resources related to pensions will be recognized in pension expense as follows:

Year ended December 31:	
2018	\$ 30,403
2019	(8,916)
2020	(91,669)
2021	(90,345)
Thereafter	 -
	\$ (160,527)

Other Postemployment Benefits

The City also participates in the cost sharing multiple-employer defined benefit group-term life insurance plan operated by the Texas Municipal Retirement System (TMRS) known as the Supplemental Death Benefits Fund (SDBF). The City elected, by ordinance, to provide group-term life insurance coverage to both current and retired employees. The City may terminate coverage under and discontinue participation in the SDBF by adopting an ordinance before November 1 of any year to be effective the following January 1.

The death benefit for active employees provides a lump-sum payment approximately equal to the employee's annual salary (calculated based on the employee's actual earnings, for the 12-month period preceding the month of death); retired employees are insured for \$7,500; this coverage is an "other postemployment benefit," or OPEB.

NOTES TO FINANCIAL STATEMENTS, Continued September 30, 2018

The City contributes to the SDBF at a contractually required rate as determined by an annual actuarial valuation. The rate is equal to the cost of providing one-year term life insurance. The funding policy for the SDBF program is to assure that adequate resources are available to meet all death benefit payments for the upcoming year; the intent is not to pre-fund retiree term life insurance during employees' entire careers.

Employees covered by benefit terms

At the December 31, 2017 valuation and measurement date, the following employees were covered by the benefit terms:

Inactive employees or beneficiaries currently receiving benefits	23
Inactive employees entitled to but not yet receiving benefits	8
Active employees	50
Total	81

The City's contributions to the TMRS SDBF for the years ended 2018, 2017, and 2016 were \$1,067, \$826, and \$1,546 respectively, which equaled the required contributions each year. The required contribution rates for the retiree for 2018, 2017, and 2016 were 0.05%, 0.04% and 0.04%, respectively.

Total OPEB Liability

The City's Postemployment Benefits Other Than Pensions Liability (OPEB) was measured as of December 31, 2017, and the Total OPEB Liability was determined by an actuarial valuation as of that date.

Actuarial assumptions:

The Total OPEB Liability in the December 31, 2017 actuarial valuation was determined using the following actuarial assumptions:

Inflation 2.5% per year

Overall payroll growth 3.5% to 10.5%, including inflation per year

Discount rate 3.31% Retirees' share of benefit-related costs \$0

Administrative expenses All administrative expenses are paid through the

Pension Trust and accounted for under reporting

requirements under GASB Statement No. 68

Salary increases were based on a service-related table. Mortality rates for active members, retirees, and beneficiaries were based on the gender-distinct RP2000 Combined Healthy Mortality Tables with Blue Collar Adjustment, with male rates multiplied by 109% and

NOTES TO FINANCIAL STATEMENTS, Continued September 30, 2018

female rates multiplied by 103%. The rates are projected on a fully generational basis by scale BB to account for future mortality improvements. For disabled annuitants, the gender-distinct RP2000 Combined Healthy Mortality Tables with Blue Collar Adjustment are used with males rates multiplied by 109% and female rates multiplied by 103% with a 3-year set-forward for both males and females. In addition, a 3% minimum mortality rate is applied to reflect the impairment for younger members who become disabled. The rates are projected on a fully generational basis by scale BB to account for future mortality improvements subject to the 3% floor.

Discount Rate:

The discount rate used to measure the Total OPEB Liability was 3.31%. The discount rate was based on the Fidelity Index's "20-Year Municipal GO AA Index" rate as of December 31, 2017.

Sensitivity of the Total OPEB Liability to Changes in the Discount Rate

The following presents the total OPEB liability of the City, calculated using the discount rate of 3.31%, as well as what the City's total OPEB liability would be if it were calculated using a discount rate that is 1-percentage-point lower (2.31%) or 1-percentage-point higher (4.31%) than the current rate:

1% Decrease		Cu	rrent Single Rate	1% Increase		
(2.31%)		As	sumption 3.31%	(4.31%)		
\$	168,316	\$	139,416	\$	117,132	

Changes in the Total OPEB Liability:

	Total OPEB		
	Liability		
Balance at 12/31/16	\$	118,457

Interest		4,576	
Changes of assumptions		11,184	
Benefit payments		(832)	
Net changes		20,959	
Balance at 12/31/17	\$	139,416	

NOTES TO FINANCIAL STATEMENTS, Continued September 30, 2018

Pension Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

For the year ended September 30, 2018, the City recognized OPEB expense of \$12,535.

At September 30, 2018, the City reported deferred outflows of resources and deferred inflows of resources related to the OPEB liability from the following sources:

	Deferred Outflows			
	of Resources			
Difference between expected and		_		
actual experience	\$	9,256		
Contributions after the measurement date		813		
Total	\$	10,069		

The City reported \$813 as deferred outflows of resources related to pensions resulting from contributions subsequent to the measurement date that will be recognized as a reduction of the net pension liability for the year ending September 30, 2019.

Other amounts reported as deferred outflows of resources related to pensions will be recognized in pension expense as follows:

Year ended December 31:	
2018	\$ 1,928
2019	1,928
2020	1,928
2021	1,928
2022	1,544
Thereafter	
	\$ 9,256

E. Employee Benefit Plans

1. Section 457 Plan

The City offers its employees a deferred compensation plan created in accordance with Internal Revenue Code Section 457. The plan, available to all City employees, permits them to defer a portion of their salary until future years. The beneficial ownership of Plan assets held in the Retirement Trust shall be held for the participants and their beneficiaries, and is not subject to the claims of the City's general creditors.

NOTES TO FINANCIAL STATEMENTS, Continued September 30, 2018

F. Tax Abatement Disclosures

The City of Mineola negotiates property tax abatement agreements on an individual basis. The City had tax abatement agreements with one entity that resulted in abatements during the year ended September 30, 2018:

<u>Purpose</u>	Percentage of Taxes Abated during	Amount of Taxes Abated during the Fiscal Year			
	the Fiscal Year	Prop	erty Tax		
Whataburger - Quick service restaurant	100%	\$	3,015		
Tota	1	\$	3,015		

Each agreement is negotiated under Article III, Section 52-a, Texas Constitution, and Chapter 380, Texas Local Gov't Code, stating that the City may establish and provide for the administration of a program for making loans and grants of public money to promote state or local economic development and to stimulate business and commercial activity in the municipality. The agreement is in accordance with Section 501.103, Texas Local Gov't Code. Taxes were abated through a rebate of taxes received.

The City has not made any commitments as part of the agreements other than to reduce taxes. The City is not subject to any tax abatement agreements entered into by other governmental entities. The City has chosen to disclose information about its tax abatement agreements individually. It established a quantitative threshold of 100% percent of the total dollar amount of taxes abated during the year.

G. Restatement

Due to the implementation of GASB No. 75, the City restated its beginning net position within governmental activities and business-type activities to properly reflect the total OPEB liability and related deferred outflows and inflows of resources, as prescribed by this accounting standard. This adjustment was recorded at the fund level for proprietary funds only, and recorded at the government-wide level for both governmental and business-type activities. In addition, the City restated beginning net position and fund balances within governmental activities due to reclassifying the CDBG grant fund.

NOTES TO FINANCIAL STATEMENTS, Continued September 30, 2018

The restatement of beginning net position and fund balance is as follows:

	Government-type			General		CDBG
	Activities			Fund		Grant
