Dear Mr. Hicks:

On September 3, 2019, the Texas Commission on Environmental Quality (TCEQ) received your corrosivity engineering report as requested in our well use approval letter dated December 8, 2016 (P-10102016-042). Based on our review, the report generally meets the minimum requirements of Title 30 Texas Administrative Code (TAC) Chapter 290 - Rules and Regulations for Public Water Systems and is **accepted**.

The submittal consisted of a corrosivity engineering report with the following information:

- 40 sites tested July 2017 and March 2017 with no copper results exceeding 1.3 mg/l and no lead results exceeding 0.015 mg/l.
- Will continue addition of blended ortho/polyphosphate (NAPCO 214) with a new target dose of 1.0 -2.0 mg/l (previously 0.5 - 1.0 mg/l).

The City of Mineola public water system provides water treatment.

Please refer to the Plan Review Team's Log No. P-09032019-011 in all correspondence for this project.

Please complete a copy of the most current Public Water System Plan Review Submittal form for any future submittals to TCEQ. Every blank on the form must be completed to minimize any delays in the review of your project. The document is available on TCEQ's website at the address shown below. You can also download the most current plan submittal checklists and forms from the same address.
